

## **Spray 370 assembly photos.**

The photographs shown in this file are examples of the assembly of the Spray 370 “Rowan Spray”. Bill Wigan assembled this kit in Dubai. While we advise against building without suitable cover we appreciate that in a hot and sunny climate like Dubai then some will prefer to work outside.

Bill used a new thin insulation coating instead of the usual ‘spray in place’ foam. We are waiting to see how it works out in practice before commenting on this material.

There are many things to learn from this set of assembly photographs and we are indebted to Bill for sending us this record of his building program.

Don't forget to switch on the pages tab shown on the left and also have a look at the options in the view tab above, including **AUTO SCROLL** & the **READ OUT LOUD FEATURE** can be interesting
