

Germanischer Lloyd is one of the leading classification societies worldwide standing for safety, quality, and economic efficiency for our shipping and industrial customers. With more than 4,000 employees in 76 countries, we are a globally operating technical monitoring group – that is precisely what we are focusing on in our slogan “Operating 24/7”.

Due to continued expansion we are currently looking to recruit a

## Graduate Engineer for Shanghai (f/m) Structural Engineer

### Responsibilities:

- Carry out structural analysis for the plan approval process in our Engineering Services East Asia office in Shanghai
- Perform strength calculations using the software POSEIDON
- Acquire an appropriate level of expertise which will enable you to work on interesting projects and in close cooperation with an international team of plan approval engineers

### Qualifications:

- Bachelor or Master degree in Naval Architecture or comparable and specialized in structural strength analysis and FEM
- Pronounced technical understanding
- Sound MS Office skills and good command of technical English, both spoken and written
- Team worker, yet also accustomed to working independently and under pressure

You can look forward to a challenging scope of chances for your advancement in a dynamically growing market. We offer excellent career development opportunities and a competitive benefits package.
