

第三节 叶轮式泵

Section 3 *Impeller pump*一、离心泵(*Centrifugal pump*)

离心泵用以产生吸排液体的主要部件是具有叶瓣的叶轮。当叶轮回转时，充满在叶轮中的液体被带动做高速旋转而获得离心力，从进口流向出口。

Principle of a centrifugal pump at zero flow

Bucket behavior if a hole is put in its base.
As viewed by a stationary observer.
