Notices and General Information

Introduction

1. The year 2008 edition of the *Rules for Building and Classing Mobile Offshore Drilling Units* is a complete reprint of the 2006 edition, consisting of the seven (7) booklets as shown in Table 1. The Rules have been reorganized, and a new Part 5 for fire and safety measures and features has been added. The survey requirements in the former Part 5 are now in Part 6, along with requirements for surveys during construction and for testing and trials. The cross-reference table in Table 4 shows the relationship between the 2006 numbering and the 2008 numbering.

The purpose of the generic title *ABS Rules for Conditions of Classification – Offshore Units and Structures (Part 1)* is to reflect the expanded contents of PART 1, as a result of including consolidated requirements for “Classification” applicable to all types of offshore units, pipelines, risers, and other offshore structures, as specified in the Foreword to Part 1.

With regard to Part 2, the purpose of the generic title *ABS Rules for Materials and Welding* is to emphasize the common applicability of the requirements to ABS-classed vessels, other marine structures and their associated machinery, and thereby make PART 2 more readily a common “PART” of various ABS Rules and Guides, as appropriate.

2. The numbering system applied in the Rules is shown in Table 2.
3. The primary changes from the 2006 edition of the Rules are identified and listed in Table 3. The effective date of the indicated Rule Changes is 1 January 2008, unless specifically indicated otherwise.
4. The effective date of each technical change since 1993 is shown in parenthesis at the end of the subsection/paragraph titles within the text of each Part. Unless a particular date and month are shown, the years in parentheses refer to the following effective dates:

(2000) and after	1 January 2000 (and subsequent years)	(1996)	9 May 1996
(1999)	12 May 1999	(1995)	15 May 1995
(1998)	13 May 1998	(1994)	9 May 1994
(1997)	19 May 1997	(1993)	11 May 1993

5. Until the next edition of the *Rules for Building and Classing Mobile Offshore Drilling Units* is published, Rule Change Notices and/or Corrigenda, as necessary, will be published on the ABS website – www.eagle.org – only, and will be available free for downloading. It is not intended to publish hard copies of future Rule Change Notices and/or Corrigenda to existing Rules or Guides. The consolidated edition of the *Rules for Building and Classing Mobile Offshore Drilling Units*, which includes Rule Change Notices and/or Corrigenda using different colors for easy recognition will be published on the ABS website only when RCN and/or Corrigenda are issued.
6. The listing of CLASSIFICATION SYMBOLS AND NOTATIONS is available from the ABS website www.eagle.org/rules/downloads.html for download.

TABLE 1
Applicable Editions of Booklets Comprising 2008 Rules

Notices and General Information		2008
Part 1:	Rules for Conditions of Classification – Offshore Units and Structures*	2008
Part 1:	Conditions of Classification (Supplement to the ABS <i>Rules for Conditions of Classification – Offshore Units and Structures</i>)*	2008
Part 2:	Rules for Materials and Welding	2008
Part 3:	Hull Construction and Equipment	2008
Part 4:	Machinery and Systems	2008
Part 5:	Fire and Safety – Measures and Features	2008
Part 6:	Surveys	2008

* Note: The requirements for conditions of classification are contained in the separate, generic ABS *Rules for Conditions of Classification – Offshore Units and Structures (Part 1)*. Additional specific requirements are contained in Part 1 of these Rules.

TABLE 2
Division and Numbering of Rules

<i>Division</i>	<i>Number</i>
Part	Part 1
Chapter	Part 1, Chapter 1
Section	Section 1-1-1
Subsection (see Note 1)	1-1-1/1
Paragraph (see Note 1)	1-1-1/1.1
Subparagraph	1-1-1/1.1.1
Item	1-1-1/1.1.1(a)
Subitem	1-1-1/1.1.1(a)i)
Appendix	Appendix 1-1-A1 or Appendix 1-A1-1

Note:

- 1 An odd number (1, 3, 5, etc.) numbering system is used for the Rules. The purpose is to permit future insertions of even-numbered paragraphs (2, 4, 6, etc.) of text and to avoid the necessity of having to renumber the existing text and associated cross-references, as applicable, within the Rules and associated process instructions, check sheets, etc.

Change Notice (2008)

TABLE 3
Summary of Changes from the 2006 Rules

EFFECTIVE DATE 1 February 2007 – shown as (1 February 2007)

<i>Part/Para. No.</i>	<i>Title/Subject</i>	<i>Status/Remarks</i>
PART 1	Rules for Conditions of Classification – Offshore Units and Structures	
1-1-4/3.3.2	Date of Contract for Construction	To reflect clarifications to IACS PR 29 to address the date of contract for construction in the event a change of ship type is made in a contract for construction after the original contract is signed between builder and Owner. (Incorporates Notice No. 2)

EFFECTIVE DATE 21 June 2007 – shown as (21 June 2007)

<i>Part/Para. No.</i>	<i>Title/Subject</i>	<i>Status/Remarks</i>
PART 1	Rules for Conditions of Classification – Offshore Units and Structures	
1-1-4/3.3.3	Series of Vessels and Optional Vessels	To align with amendments to IACS PR 29 (Rev. 4) to only require the alterations from the original design to comply with classification requirements/amendments which have come into effect since the “date of contract for construction” of the “series”, rather than changing the date of contract for construction for the entire vessel or vessels. (Incorporates Notice No. 4)

EFFECTIVE DATE 1 January 2008 – shown as (2008)

<i>Part/Para. No.</i>	<i>Title/Subject</i>	<i>Status/Remarks</i>
PART 1	Rules for Conditions of Classification – Offshore Units and Structures	
1-1-8/1.3i)	<No Title>	To align information in operating manual with design limits.

EFFECTIVE DATE 1 January 2007 – shown as (2007)
(based on the contract date for new construction between builder and Owner)

<i>Part/Para. No.</i>	<i>Title/Subject</i>	<i>Status/Remarks</i>
PART 3	Hull Construction and Equipment	
3-1-3/5.7	Selection Criteria for ABS Grades of Steel	To clarify the acceptance requirements for steels with thickness greater than 50 mm (2.0 in.). (Incorporates Notice No. 1)
3-1-3/Table 1	Material Selection Requirements for ABS Ordinary and Higher Strength Steels	To clarify the acceptance requirements for steels with thickness greater than 50 mm (2.0 in.). (Incorporates Notice No. 1)
PART 4	Machinery and Systems	
4-2-2/7.3	Plans and Data to be Submitted	To outline documentation to be submitted for plastic piping approval. (Incorporates Notice No. 1)
4-2-2/7.5.4	Temperature	To allow the use of polyethylene, polypropylene and polybutylene pipes. (Incorporates Notice No. 1)

Notices and General Information

Part/Para. No.	Title/Subject	Status/Remarks
4-2-2/7.5.9	Marking	To add a date of production to the marking for the purpose of traceability. (Incorporates Notice No. 1)
4-2-2/7.9	Manufacturing of Plastic Pipes	To clarify acceptance of a manufacturer's quality system and the involvement of the Surveyor during testing. (Incorporates Notice No. 1)
4-2-2/7.19 (New)	Testing by Manufacturer – General	To provide requirements for testing by manufacturer. (Incorporates Notice No. 1)
4-2-2/Table 3 (New)	Standards for Plastic Pipes – Typical Requirements for All Systems	To provide a list of applicable Standards that may be used in testing rigid pipes, pipe joints and fittings, based on IACS UR P4.7 and IACS Recommendation 86. (Incorporates Notice No. 1)
4-2-2/Table 4 (New)	Standards for Plastic Pipes – Additional Requirements Depending on Service and/or Location of Piping	To provide a list of applicable Standards that may be used in testing rigid pipes, pipe joints and fittings, based on IACS UR P4.7 and IACS Recommendation 86. (Incorporates Notice No. 1)
4-2-3/1.9	Termination of Vent Pipes	To provide technical details regarding the construction of corrosion resistant flame screens. (Incorporates Notice No. 1)
4-2-4/7.1	General	To align the requirement with the original terminology and intent as originated in the <i>Steel Vessel Rules</i> (1997). (Incorporates Notice No. 1)
4-2-6/7.1	General	To clarify the requirements for hazardous areas associated with helicopter storage and refueling equipment, based on IMO Resolution A.855(20) "Standards for On-Board Helicopter Facilities". (Incorporates Notice No. 1)
4-3-2/15.5.2 (New)	Communication in Case of an Emergency	To clarify the requirements for interior communication systems for non-self-propelled units, based on 5.6 of the IMO MODU Code. (Incorporates Notice No. 1)
4-3-2/15.9	Public Address System	To add titles to clarify the requirements.
4-3-3/9.7.3	Type Test	To align the requirements with IACS UR F29 (Rev. 5). (Incorporates Notice No. 1)
4-3-4/3.11.2	Ambient Temperature	To clarify the requirements for temperature rise for rotating machines installed outside of machinery spaces. (Incorporates Notice No. 1)
4-3-4/3.21.2	Voltage Regulation	To align the requirements with IACS UR E13. To clarify the requirements for the limits of voltage variation from rated voltage during transient conditions. (Incorporates Notice No. 1)
4-3-4/13.1.1	General	To align the requirements with the Second Edition of IEC 60092-376 "Electrical Installations in Ships – Cables for control and instrumentation circuits 150/250 V (300 V)". (Incorporates Notice No. 1)
4-3-4/Table 3	Limits of Temperature Rise for Air-Cooled Rotating Machines	To update the table and to clarify the requirements for temperature rise for rotating machines installed outside of machinery spaces. (Incorporates Notice No. 1)
4-3-5/3.3	System Design	To incorporate requirements to address new designs for electric propulsion systems. (Incorporates Notice No. 1)
4-3-5/3.17.9	Semiconductor Converters for Propulsion	To update and clarify the requirements. (Incorporates Notice No. 1)
PART 5 Fire and Safety –Measures and Features		
5-3-1//7	Emergency Control Stations	To add a cross-reference to 4-3-2/15.5.2. (Incorporates Notice No. 1)

Notices and General Information

EFFECTIVE DATE 1 July 2007 – shown as (1 July 2007)
 (based on the contract date for new construction between builder and Owner)

Part/Para. No.	Title/Subject	Status/Remarks
PART 3 Hull Construction and Equipment		
3-3-1/11	Onboard Computers for Stability Calculations	To clarify the application of Appendix 3-3-A2 and limit the requirements for approval of software only, in line with IACS UR L5 (Rev. 2). (Incorporates Notice No. 3)
Appendix 3-3-A2	Onboard Computers for Stability Calculations	To clarify the application of Appendix 3-3-A2 and limit the requirements for approval of software only, in line with IACS UR L5 (Rev. 2). (Incorporates Notice No. 3)

EFFECTIVE DATE 1 January 2008 – shown as (2008)
 (based on the contract date for new construction between builder and Owner)

Part/Para. No.	Title/Subject	Status/Remarks
PART 3 Hull Construction and Equipment		
3-1-2/1.1	General	For consistency with 3-1-2/1.11.
3-1-2/1.11	Gravity and Functional Loads	The loadings applied to jack-up elevated analysis in the current Rules do not include sufficient guidance on the application of drilling loads and the overall effects of these and gravity loads on the on-bottom stability of the unit.
3-1-2/1.13 (Deleted)	Units Resting on the Sea Bed	The loadings applied to jack-up elevated analysis in the current Rules do not include sufficient guidance on the application of drilling loads and the overall effects of these and gravity loads on the on-bottom stability of the unit.
3-1-2/1.5.4	Wave-induced Dynamic Responses	To provide guidance on wave induced dynamic responses.
3-2-1/3.11	Equivalent Stress Criteria for Plated Structures	To make the ABS <i>Guide for Buckling and Ultimate Strength Assessment for Offshore Structures</i> a compulsory standard to be complied with for the buckling strength of plated structures.
3-2-2/11	Appurtenant Structure	To provide additional guidance on the design of important appurtenant structures.
3-2-3/5	Units Elevated Modes	To reorganize the requirements for better flow. 3-2-3//5.13 expanded to include requirements for determining spudcan rotational stiffness.
3-2-3/7	Legs	To reorganize the requirements for better flow.
3-2-3/9 (New)	Hull Interface Structure with Legs	To include requirements for the interface between the hull and the legs.
3-2-3/11	Hull Structure	To reorganize the requirements for better flow.
3-2-3/13 (New)	Spudcan and Bottom Mat	To include requirements for spudcan scantlings.
3-2-3/15	Deckhouses	To reorganize the requirements for better flow.
3-2-4/1.5	Effect of Mooring Forces on Local Structure	To provide guidance for checking the effect of mooring forces on local structures.
3-2-4/3.1	General	To define “upper structure”.
3-2-4/3.11	Non-buoyant Upper Structure Not Subjected to Wave Loading	To provide guidance for design of non-buoyant upper structures.
3-2-4/3.13	Buoyant Upper Structure	To provide guidance for design of buoyant upper structures.
3-2-4/3.15 (New)	Upper Structure Subjected to Wave Loading	To provide guidance for design of upper structures that are subjected to wave loading. (Existing 3-2-4/3.15 relocated to 3-2-4/7.3.)
3-2-4/3.17	Deckhouses	Relocated to 3-2-4/7.1.
3-2-4/7 (New)	Deckhouses	To provide guidance for design of deckhouses. (Existing 3-2-4/7 relocated to 3-2-4/13.)

Notices and General Information

Part/Para. No.	Title/Subject	Status/Remarks
3-2-4/9.1	Afloat Modes of Operation	To clarify the intent of the requirements.
3-2-4/11.5	Upper Structure	To clarify the intent of the requirements.
3-3-1/3.3.3	Residual Stability Criteria – Column-Stabilized Units	To clarify the difference between residual stability criteria for collision damage and for remote flooding.
3-3-1/Figure 3A	Residual Damage Stability Requirements for Column-Stabilized Units – Collision Damage [see 3-3-1/1.3.2(a)]	To clarify the difference between residual stability criteria for collision damage and for remote flooding.
3-3-1/Figure 3B (New)	Residual Damage Stability Requirements for Column-Stabilized Units – Remote Flooding [see 3-3-1/1.3.2(b)]	To clarify the difference between residual stability criteria for collision damage and for remote flooding.
3-3-1/9.1	Weathertight Integrity	Second paragraph relocated to 3-3-1/3.3.3(a)iii).
PART 4		Machinery and Systems
4-1-1/15 (New)	Ambient Temperature	To specify the ambient temperatures of air and seawater, in line with the <i>Steel Vessel Rules</i> , and based on IACS UR M28 and M40.
4-1-1/Table 2 (New)	Ambient Temperatures for Unrestricted Service	To specify the ambient temperatures of air and seawater, in line with the <i>Steel Vessel Rules</i> , and based on IACS UR M28 and M40.
4-2-2/21.9	Sea-Water Inlet and Discharge Valves	To clarify that remote position indication for shell valves is to be independent of the actuating system to assure accuracy of the valve position.
4-2-6/5.3.3	Electrical Installation in Storage Room	To specify the types of electrical equipment that may be installed in hazardous areas associated with oxygen-acetylene rooms.
4-2-6/7.1.2	Hazardous Areas	To clarify the required gas group and temperature class equipment permitted in hazardous areas associated with helicopter refueling facilities.
4-3-1/9	Voltage and Frequency Variations	To incorporate IACS UR E5 (Rev. 1). To specify voltage variations for DC distribution systems (based on IEC 60092-101) and for battery systems (based on IEC 60092-504).
4-3-1/Table 1	Voltage and Frequency Variations	To incorporate IACS UR E5 (Rev. 1). To specify voltage variations for DC distribution systems (based on IEC 60092-101) and for battery systems (based on IEC 60092-504).
4-3-2/5.5.4	Emergency Generator for Non-emergency Services	To clarify that the protection of the emergency generator from overload is to be automatic and to align the requirement with IACS UI SC3.
4-3-2/9.3.2	Trip Setting for Coordination	To provide references to 4-3-2/9.5.1 and 4-3-2/9.5.2(a).
4-3-2/9.5.1	Short-time Delay Trip	To require the current setting of the short time delay trip to be less than the steady state short circuit current of the generator ensure that the generator breaker will trip in the event of a short circuit. Also, for generators less than 200 kW, to clarify that the thermal withstanding capacity of the generator is to exceed the steady state short circuit current until the tripping system activates.
4-3-2/9.5.2(a)	Instantaneous Trip	To provide a reference to 4-3-2/9.3.2.
4-3-3/1.9 (New)	Maintenance Schedule of Batteries	To incorporate IACS UR E18.
4-3-3/3.7.2(a)	Large Batteries	To specify the types of electrical equipment that may be installed in hazardous areas associated with battery rooms.
4-3-3/3.7.5 (New)	Maintenance of Batteries	To incorporate IACS UR E18.
4-3-3/3.7.6 (New)	Replacement of Batteries	To incorporate IACS UR E18.
4-3-3/3.29 (New)	Services Required to be Operable Under a Fire Condition	To incorporate IACS UR E15 (Rev. 2). To define the services required to be operable under a fire condition.

Notices and General Information

Part/Para. No.	Title/Subject	Status/Remarks
4-3-3/3.31 (New)	High Fire Risk Areas	To incorporate IACS UR E15 (Rev. 2). To provide examples of high fire risk areas.
4-3-3/5.9.3(a)	Installations	To relocate the requirements for flame retardancy from 4-8-4/5.9.3(e).
4-3-3/5.9.3(b)	Safe Working Load	To add a reference to Appendix 4-8-4A1 of the <i>Steel Vessel Rules</i> .
4-3-3/5.9.3(d) (New)	Hazardous Areas	To clarify that cable trays and protective casings passing through hazardous areas are to be electrically conductive in all cases.
4-3-3/5.9.3(e)	Type Testing	To clarify that cable trays and protective casings are to be tested to at least the tests specified in Appendix 4-8-4A1 of the <i>Steel Vessel Rules</i> .
4-3-3/5.17.1	Location	To incorporate IACS UR E15 (Rev. 2). To bring the requirements in line with the <i>Steel Vessel Rules</i> and to more clearly indicate the intent of the requirements.
4-3-3/5.17.2 (New)	Services Necessary Under a Fire Condition	To incorporate IACS UR E15 (Rev. 2). To specify the criteria for cables passing through high fire risk areas when the cables are for services required to be operable under a fire condition
4-3-3/Figure 2 (New)	Cables within High Fire Risk Areas	To incorporate IACS UR E15 (Rev. 2). To specify the criteria for cables passing through high fire risk areas when the cables are for services required to be operable under a fire condition
4-3-4/7.3.1(d)	Battery Charger Units, Uninterruptible Power Supply (UPS) Units, and Distribution Boards	To incorporate requirements for Surveyor attendance for UPS units of 50 kVA and over and battery charger units of 25 kW and over.
4-3-4/7.19	Battery Systems and Uninterruptible Power Systems (UPS)	To clarify the application of the requirements.
4-3-4/7.19.1 (New)	Definitions	To add definitions for uninterruptible power systems.
4-3-4/7.19.2	Battery Charging Rate	To clarify application to battery charger units and UPS units.
4-3-4/7.19.3	Reversal of Charging Current	To clarify application to battery charger units and UPS units.
4-3-4/7.19.4 (New)	Design and Construction	To incorporate the requirements of IACS UR E21.
4-3-4/7.19.5 (New)	Location	To clarify the requirements for locating battery charger units, UPS units and the associated batteries.
4-3-4/7.19.6 (New)	Performance	To specify performance requirements for battery duration, battery capacity and battery recharging.
4-3-4/7.19.7 (New)	Testing and Survey	To specify the testing requirements for battery charger units and UPS units.
4-3-4/13.1.1	General	To incorporate the requirements of IACS UR E7 (Rev 3).
4-3-4/13.1.3	Fire Resistant Property	To incorporate IACS UR E15 (Rev. 2). To provide a cross reference to 4-3-3/3.29 and 4-3-3/5.17.
4-3-5/1.11.3(a)	Application	To update the references to the current IEC standards.
4-3-5/3.7.6 (New)	Direct-current (DC) Propulsion Motors Supplied by Semiconductor Converters	To require submission of the maximum time-current characteristics that can be commutated by a DC motor, as well as the time-current current characteristics of the protective features of semiconductor converters, in order to avoid flashovers.

Notices and General Information

The reference date which is indicated in the parentheses following the title of the requirement in this Part is the date that the requirement becomes effective [e.g., 6-2-1/1 “Definitions” (2008) is to apply for vessels undergoing survey on or after 1 January 2008]

EFFECTIVE DATE 1 January 2008 – shown as (2008)

<i>Part/Para. No.</i>	<i>Title/Subject</i>	<i>Status/Remarks</i>
PART 6	Surveys	
6-2-1/1 (New)	Definitions	To incorporate appropriate definitions for terms used in the survey requirements.
6-2-2/1	Special Surveys, Drydocking Surveys, and Underwater Inspections in Lieu of Drydocking	To address survey pre-planning requirements based on MODU classification experience.
6-2-2/3 (Deleted)	Underwater Inspection in Lieu of Drydocking	To address survey pre-planning requirements based on MODU classification experience.
6-2-4/3.1 (Title Only)	General	To address Special Survey requirements based on MODU classification experience and input from the “Aging Rig” Ad Hoc committee.
6-2-4/3.3 (New)	Thickness Gauging Requirements	To address Special Survey requirements based on MODU classification experience and input from the “Aging Rig” Ad Hoc committee.
6-2-4/3.5 (New)	Nondestructive Testing	To address Special Survey requirements based on MODU classification experience and input from the “Aging Rig” Ad Hoc committee.
Appendix 6-2-A1 (New)	Guide for Lay-up and Reactivation of Laid-up Mobile Offshore Drilling Units	To update the requirement for reactivation of laid-up mobile offshore drilling units.

TABLE 4
Comparison of the Numbering System of the 2006 Rules vs. 2008 Rules

<i>MODU 2006</i>	<i>Title</i>	<i>MODU 2008</i>
Part 1	Conditions of Classification	
Whole Part	<p>The requirements for “Conditions of Classification” in Part 1 of the 2006 edition of the <i>Rules for Building and Classing Mobile Offshore Drilling Units</i> were relocated to the new, generically re-titled ABS <i>Rules for Conditions of Classification – Offshore Units and Structures (Part 1)</i>, which now includes consolidated requirements applicable to all offshore units, installations, vessels or systems. Those classification requirements specific to MODUs were retained in a supplemental Part 1 of the <i>MODU Rules</i>.</p> <p>In the list below, references to the ABS <i>Rules for Conditions of Classification – Offshore Units and Structures (Part 1)</i> are given as “CC 1-1-X/Y.Y.Y” and references to Part 1 of the <i>MODU Rules</i> are given as “1-1-X/Y.Y.Y”.</p>	Part 1 and New “Generic” Part 1
