# READER RESPONSE FORM

## *Safety In Designs*

We are very interested in comments and suggestions for improving this manual and keeping it up to date. Please use this form to suggest changes; notify us of errors or inaccuracies; provide information that reflects changing technology; or submit material (drawings, specifications, procedures, etc.) that should be considered for inclusion.

Feel free to include photocopies of page(s) you have comments about. All suggestions will be reviewed as part of the update cycle for the next revision of this manual.

Send your comments to:

Supervisor, Document Control  
Room 50-4328  
Chevron Research and Technology Company
