

## Calculation of Weight of Upper Deck 4<sup>th</sup> Coat (Final)

### HEMPATHANE TOPCOAT 55210

1: Painting Scheme (Refer to Drawing No.K2310602)

Position	Painting Specification	DFT	Color	Total DFT
Upper Deck	1 <sup>st</sup> : HEMPADUR MASTIC 45880	100 um	red/50630	100+100+50+50 =300 micron
	2 <sup>nd</sup> : HEMPADUR MASTIC 45880	100 um	grey/11480	
	3 <sup>rd</sup> : HEMPADUR 45080	50 um	off white/11630	
	4 <sup>th</sup> (final): HEMPATHANE TOPCOAT 55210	50 um	Grey/11480	

2: Parameter of HEMPATHANE TOPCOAT 55210:

No.	Sign/Title	Content	Value	Unit
1	SVR	Solid volume rate	51 (from HEMPEL Data Sheet)	%
2	DFT	Dry film thickness	50 (4 <sup>th</sup> ) (from Painting Scheme, Page 11)	micron
3	Surface area in m <sup>2</sup>	A=A1+A2+A3 A1→ A2→ A3→	Including (1): upper deck except accommodation part (2): deck beam (both side with top face plate) (3): deck longitudinal (both side) Refer to drawing "Midship Section"	m <sup>2</sup>
5	Loss factor by quantity		0.6	
6	Specific Gravity		1.2 (from HEMPEL Data Sheet)	kg/liter

4: Calculation Process

No.	Sign/Title	Progress	Unit
1	(1): upper deck except accommodation part: A1	$[16 \times 0.6(\text{distance between frame}) + 3 \times 0.8(\text{distance between frame}) + (254 - 43) \times 0.7(\text{distance between frame})] \times 32.2$ $= (16 \times 0.6 + 2.4 + 211 \times 0.7) \times 32.2$ $= 159.7 \times 32.2$ $= 5142.34$	m <sup>2</sup>
2	(2): deck beam (both side with top face plate) A2:	$1.2(\text{height}) \times 28(\text{length}) \times 40(\text{No.}) \times 2(\text{both face})$ $+ 0.3(\text{width}) \times 28(\text{length}) \times 40(\text{No.}) \times 2(\text{both face})$ $= 2688 + 672$ $3360$	m <sup>2</sup>
3	(3): deck longitudinal (both side) A3:	$0.22(\text{height}) \times (254 - 43) \times 0.7(\text{distance between frame}) \times 38(\text{No.}) \times 2(\text{both face})$ $= 2469.54$	m <sup>2</sup>
4	A=A1+A2+A3	$5142.34 + 3360 + 2469.54 = 10971.88$	m <sup>2</sup>
5	Theoretical paint consumption	$(\text{DFT} \times \text{A}) / (10 \times \text{SVR}) = (50 \times 10971.88) / (10 \times 51)$ $= 1075.67$	liter

6	Planned Practical Consumption with 0.6 quantity loss factor	$1075.67 \times 1.6 = 1721.07$	liter
		$1721.07 / 20 = 86$	can/unit
7	Weight of Planned Practical paint consumption with 0.6 quantity loss factor	$1721.07 \times 1.2 = 2065.28$	kg
